Presentation of the project "Quality of life is for everyone"

We have entered into an agreement with a male residence for the mentally disabled children and young people, all at the age 4-30 years. The home is located north of Lviv, Ukraine, and is functioning as the home of 74 boys. As a direct consequence of the Russian invasion, many orphanages has been destroyed. Especially in the eastern part of the country the damages was major. The children from these places have been relocated to the more calm parts of the country. Unfortunately, the homes that was already burdened to the point of breaking, now have to cope with a significantly larger task, but without any added resources. As a direct result of this, the home in Lviv who used to house 35 residents, now have to take care of 74.

In Ukraine, mentally disabled children is an often forgot about and hidden group of people. The conditions under which they live, is practically speaking, not suitable for humans. At the moment, there are only two caregivers at the home to handle everything. This is an impossible task, the working conditions taken in to consideration. The sanitary conditions at the home, is in such bad condition, that they are not suitable for use. The youngest children stays around the clock, at a 20 bed section, where they spend the main part of their day in a crib, without any kind of socialization. There is a big need of facilities for mental recreation, as well as socialization. The staff is very dedicated to their jobs, but the situation at the home is providing them very poor working conditions, which makes further measures impossible to implement

We wish to carry out a major renovation at the home. Further more we wish to establish suitable conditions, which will make it possible to give these children and young men an adequate quality of life, in the shape of appropriate physical care, social care and stimulation.

We are leaving again to visit the home on Saturday, march 4. We will bring a technical consultant, a social pedagogue, and a photographer, whom will document the actual conditions.

We are 100% capable of implementing the project. We possess the necessary skills and capacity, to follow this project all the way through. Funding is without doubt the biggest hurdle we have to overcome, in order to secure these children and young people a decent life, and the Quality of life that they deserve.

Yours sincerely
